K2 Energy Provides Cells, Modules and Systems

Energy & Power Cells
K2 offers both high power batteries for rigorous duty cycles and high energy batteries for long cycle and calendar life.

Modules
K2 modules are building blocks for fully customized, scalable battery solutions. They deliver high capacity, power and energy safely.

Systems
K2’s development & engineering expertise spans all aspects of system design. Because we produce cells, create Battery Management Systems (BMS), and assemble modules, our customer’s customized systems can be rapidly brought to market.
K2 Energy not only provides cutting edge technology in the Lithium ion energy storage market, but has a world class team of scientists and engineers with extensive knowledge and experience in all aspects of energy storage design, systems integration, manufacturing, support testing and quality control.

K2 Energy batteries are designed to offer extremely long cycle life, high energy densities, outstanding performance, and quick charging times, while also being environmentally sustainable and providing exceptional safety.
R2 Energy batteries are designed to offer extremely long cycle life, high energy densities, outstanding performance, and quick charging times, while also being environmentally sustainable and providing exceptional safety.
