

Advantage

Global Technology Connection, Inc. is located in the vicinity of Georgia Tech and has developed a very close relationship with them. Global Technology Connection, Inc. has also partnered with several institutions of higher learning such as Penn State, Texas A&M, Purdue etc. and National Laboratories such as Oak Ridge and Sandia.

Global Technology Connection, Inc. develops technology tools for Asset Management that can substantially reduce the maintenance cost and increase uptime. These tools can prevent failures in a variety of equipment and machinery like HVAC, Elevators, and Power Turbines etc. Global Technology Connection, Inc. also works with original equipment manufacturers to make technology tools that can be embedded into the new equipment sold in the market.

Global Technology Connection, Inc. aims to be the prominent supplier of choice for the technology Asset Management government and industrial applications. Customization of the tools for cost efficiency and technological compatibility is our focus. Accurate assessments of the need analyzed by a dedicated, team of professionals, help catalyze the path to success.

Global Technology Connection

Connecting Technology to Business...

Diagnostics & Prognostics

Reduce Cost of Maintenance

Increase Safety

Increase Uptime

Reduce Manning

Reduce Spare Parts

Green Solutions

Global Technology Connection, Inc. has 12 years of history in design, development and commercialization of innovative technology products and services in the area of Predictive Maintenance; Modeling and Simulation; Advanced Materials and Failure Prevention & Analysis. These innovative products can substantially reduce the maintenance costs, increase uptime (availability) and improve safety in a variety of equipment and machinery such as HVAC, Pumps, Batteries, Generators, Power Turbines, Trucks etc. GTC also partners with OEMs to make technology tools that can be embedded into the original equipment.

To build state of the art technology products and services that uniquely provide innovative, cost effective solutions.

- Machinery and Equipment Condition
- Prognostic and Diagnostic Solutions
- Modeling and Simulations
- Data Analytics
- Data Mining
- Machine Language Learning

- **Significant maintenance savings 1st year and in successive years.**
- **Reduced risk from premature failures.**
- **Increased “uptime”**
- **Reduced maintenance personnel and fewer repair parts.**
- **Intangible benefits: improved supportability, availability and reliability of equipment.**

- **Tibbetts Award Winner for 2006.**
- **First Company in South East US chosen by NASA Glenn Commercialization Initiative.**
- **Lockheed Martin Mentor-Protégé Company.**
- **Member, Georgia Center of Innovation.**
- **GMSDS/NMSDC Certified.**
- **Approved for military critical technical data by US/Canada Joint Certification Office**
