La Jolla Logic is an advanced technology and information system security solution business headquartered in Southern California.   Our professional staff has technical, programmatic and executive leadership experience spanning over 20 years supporting the US Department of Defense (DoD), academic institutions and the commercial sector. We are an SBA 8(a) Certified, Economically Disadvantaged Woman-Owned Small Business (EDWOSB) with a reputation for performance to the highest standard.

As a provider of world-class service, quality work products and with a focus on a customer-centered cooperative work approach, our staff specializes in the following areas:
- DoD Grade Information Assurance Services
- Certified Information System Security Professional (CISSP) Subject Matter Expertise
- Cross Domain Systems (CDS)
- Secure Enterprise Architectures
- Risk Assessment and Management
- Advanced Technology Assessment
- Technical Proposal and Concept Development Services
- Programmatic and Organizational Leadership Support

La Jolla Logic customers realize cost savings through our ability to expertly plan tasking and efficiently execute on projects. We bring years of experience, specialized knowledge and a 'do it right the first time' principle for execution. Our superior work ethic and an impressive base of repeat customers make our staff the right choice for addressing your challenging information system & technology needs.

In the capacity of Information System (IS) development, Cybersecurity (CS), and Information Technology (IT) support, our staff has significant experience in developing, deploying and accrediting new capabilities for fielding in operational US Navy environments. Our team supports Space and Naval Warfare (SPAWAR) Program Executive Office (PEO) Command, Control, Communications, Computers and Intelligence (C4I), the Data Consolidation and Application Optimization (DCAO) program in part with the Navy Enterprise Data Centers (NEDCs) and has been awarded a Seaport-E Prime Contract Vehicle to provide superior service to Naval Sea Systems Command (NAVSEA) PEO, Directorates and Field Activities. We have extensive subject matter expertise in the area of CS, and routinely work with the US Navy's accrediting authorities. La Jolla Logic is pending a Phase II Small Business Innovative Research (SBIR) award for developing advanced cybersecurity capabilities.

As a Seaport-e Prime Contractor, we possess technical capabilities, experience and expertise in several of the Seaport-e functional areas. These include:

- Information System (IS) Development, Information Assurance (IA), and IT Support
- Program Support
- Research and Development Support
- Engineering, System Engineering and Process Engineering Support
- Prototyping, Pre-Production, Model-Making, and Fabrication Support
- System Design Documentation and Technical Data Support
- Software Engineering, Development, Programming, and Network Support

In the commercial space, we leverage our 'Military Grade' cybersecurity expertise to identify and manage risk, address challenging technical issues and strengthen defenses to protect the critical data and infrastructure for our select commercial clientele.

As a small business, our staff members are versatile and cross trained to manage technical and programmatic activities in a variety of functional areas.
