

**E N G I N E E R I N G**  
RESEARCH & DEVELOPMENT SERVICES

## ENGINEERING SERVICES

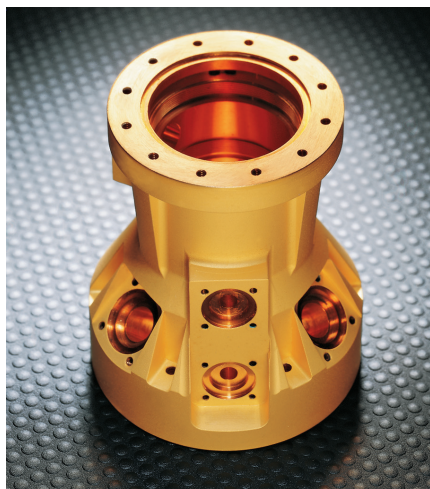

A reputation  
for skill and  
creativity  
in the solution  
of difficult  
problems.

**CREARE PROVIDES ENGINEERING SERVICES** to a diverse international customer base.

Since 1961, we have served industry and government on the frontiers of product and process technology. Creare engineers combine judgment and sophisticated scientific, mathematical, computational, and experimental methods with an appreciation of the art where science is lacking. We have a reputation for skill and creativity in the solution of difficult problems.

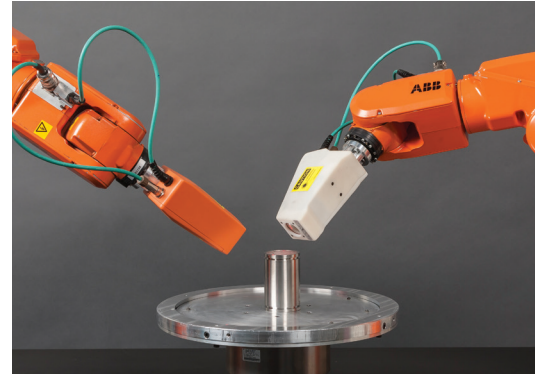

We offer our clients a broad range of services, including:

- Applied Research
- Prototype Design and Fabrication
- Analysis and Modeling
- Laboratory and Field Testing
- Software Development
- Consulting and Legal Services

# TECHNOLOGY AREAS

**CREARE IS ORGANIZED SPECIFICALLY TO UTILIZE** the talents of exceptionally creative engineers in an environment that is responsive to client needs and emphasizes a results-oriented approach. Our organization is project-centered and multidisciplinary.

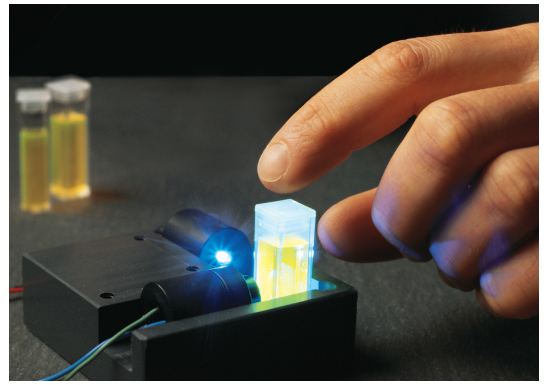

As a guide, we have demonstrated expertise in:

- Biomedical and Human Systems
- Cryogenics
- Fluid & Thermal Systems
- Sensors & Control Systems
- Advanced Manufacturing
- Power Systems
- Electronics
- Software Development

From consulting to  
full-scale product and  
process development.

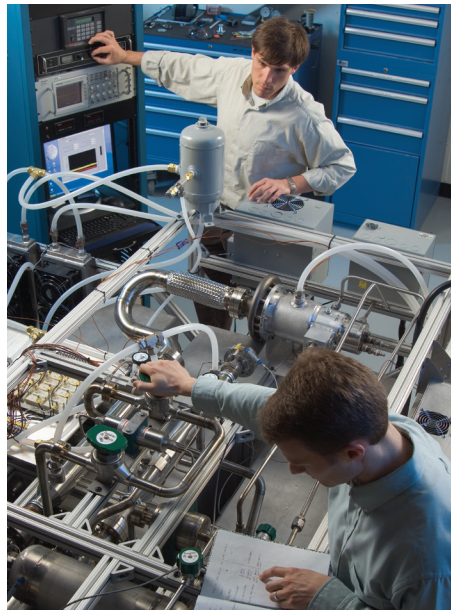

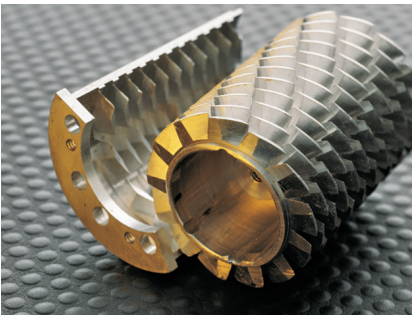

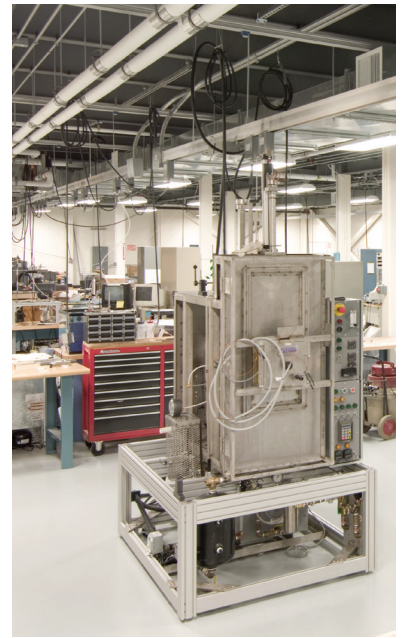

## CLIENTS

**CREARE HAS SERVED HUNDREDS OF CLIENTS**, from Fortune 500 companies to fledgling small businesses to an array of government agencies. Creare works in diverse industries ranging from aerospace to biomedical to consumer products to heavy manufacturing. Depending on the need, we fulfill varied roles with our clients from on-call expert to regular R&D outsource provider. We can function as co-workers on a joint team or take full responsibility for an entire effort and result. We maintain client-proprietary information in strict confidence. We value our client relationships highly. Our business is to serve our clients, whether we are providing advice, designs, hardware, or software.

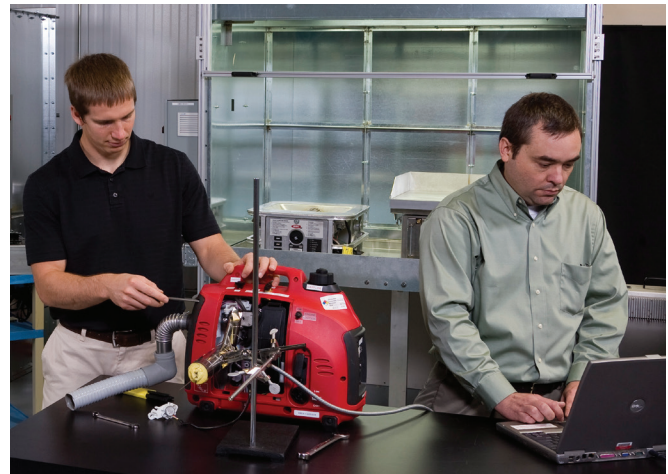

A passion for  
creativity and  
a drive for  
excellence.

# FACILITIES

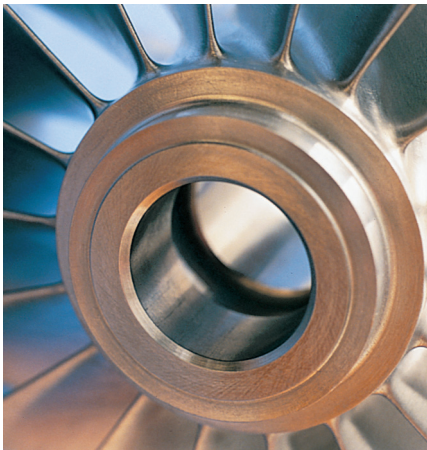

**ALTHOUGH OUR PEOPLE ARE OUR MOST IMPORTANT ASSET,** we have established extensive facilities and support systems. Our laboratory, fabrication, and experimental facilities enable us to perform work varying in size from the microscopic to large outdoor experiments, and at temperatures ranging from those of liquid helium to plasmas. Our projects can be exploratory in nature, but we also can apply space-qualified QA procedures when needed. We place special emphasis on precision work and the development of innovative fabrication techniques.

More than 80,000 square feet of office, laboratory, shop, and library space.
